EDUCATION

2022-2025

ISSET'COM UNIVERSITY

- Management of Information and Communication Technologies
- Acquired skills in creating and managing a company.
- Developed expertise in internal and external communication using modern technologies.

SKILLS

- Web Development: React, Nodejs, Angular, Spring, C, WebSocket, MongoDB, MySQL.
- Tools: Git, VSC, GitHub Pages, Railway
- Understanding of Marketing, Management, and Communication concepts
- Design & Graphics: Adobe Photoshop, Canva

LANGUAGES

- English (Intermediate)
- French (Fluent)
- Arabic (Fluent)

PROFILE

A motivated full-stack developer with a solid foundation in information and communication technologies. I enjoy working with others and look forward to using my skills to build great applications.

EXPERIENCE

Banque Zitouna — Intern

2025

February to May

Project: Design and Development of a Secure Document Management System for Procurement Processes

- Led the **full-stack development** of an electronic document management application using **Angular** (Frontend) and **Spring Boot** (Backend), digitizing procurement workflows and reducing manual processing time by 50%.
- Implemented **role-based access control** (RBAC) with **Keycloak authentication** and **JWT-secured APIs**, ensuring compliance with banking security standards.
- Engineered real-time **document tracking** with immutable audit logs and integrated **DocuSign** for electronic signatures, enabling end-to-end traceability of approvals.
- Developed a **C++ OCR** module (deployed as a Dockerized executable) to automate metadata extraction from PDFs, eliminating manual data entry errors.
- Followed **Agile (Scrum)** methodology across 5 sprints, delivering iterative releases with user feedback integration.

Poste — Intern

2024

January to February

- Developed a scoring system using RFID card technology.
- Created and connected an admin website to the RFID scoring system, making it easier for users to access and receive positive feedback from all administrators during early testing.

Télécom — Intern

2023

January to February

- Created a website using HTML, CSS, JavaScript, and WAMP Server to improve the management of data for GSM sites and cell towers, making it easier to access information and work more efficiently.

PERSONAL PROJECTS

- **Developed four applications using React, Node.js, JavaScript, HTML and CSS:** 2024
 - Snake Game
 - Maze Generator and Path Finder
 - Ray Casting
 - Elastic Collisions[Click here to view my Projects](#)

EXTRACURRICULAR ACTIVITIES

- **National Badminton Player**
 - Competed at a national level and achieved 6-time National Champion status.
- **Badminton Trainer**
 - Coaching and mentoring players, focusing on skill development and competitive strategies.
